

## PowerAire<sup>®</sup> Quad

### Fan Assisted Airflow Controls

The PowerAire<sup>®</sup> Quad fan is equipped with 4 fans connected in parallel to provide built-in redundancy. This unit is only 150mm deep making it ideal for retrofit situations with finished floor heights as low as 250mm. This unit can cool up to 16 kW of supported IT load per PowerAire<sup>®</sup> / RhinoROC<sup>®</sup> airflow panel combination.

### Key Performance Characteristics

- Zero maintenance
- Installation can be carried out by IT staff
- Multiple control options available
- User programmable set point
- EC fan technology is variable from 0-100 %
- Available in 220 V 50HZ power
- Viewable Peak Temp for walk-through check of racks
- Available Auto Transfer Switch offers A/B power feed
- 24" and 60 cm raised floor compatible
